

## The dwarven city of Khazad-dum

Deep in the Misty Mountains lies the forgotten dwarven city of Khazad-dum according to Loretome. There are many myths about the riches, which the dwarfs wrested from the mountain in their lust for gold, but unfortunately no one no longer knows the location of the forgotten dwarven city. On your journey through the Misty Mountains you came across a hidden cave entrance not far from your path and decided to build your camp for the night. In the light of the fireplace you discover old and weathered runes on the walls of the cave which must have been carved in the stone a long time ago. You take the decision to venture further into the unkown depths after sunset..

A This secret door is only visible from the outside.

B Treasure search reveals un inconspicuous brown vial of unknown content (healing potion +3).

C The cupboard is empty but reveals a lever to activate the secret door.

D After the last hero has passed a falling rock forever blocks the way back.

E This treasure chest contains 150 gold and a rusty helmet (+1 defense).

F Search for treasure reveals a vessel containing a strange blue liquid (paralyzing poison: -1 red die if no black shield is rolled).

G Search for treasure reveals a dusty stone fragment with unkown runes. This could be useful later.
